Case Study 18 – Hotel Reservation Website Interface

Description

Design a hotel reservation website that allows users to explore available rooms, view facilities, check tariffs, and make reservations through an online booking form.

Key Features

- Different room categories with images
- Information about hotel facilities
- Room prices and tariffs
- Check-in and check-out date fields
- Reservation and booking forms
- Attractive room cards
- Responsive booking sections for different screen sizes

Technologies Used

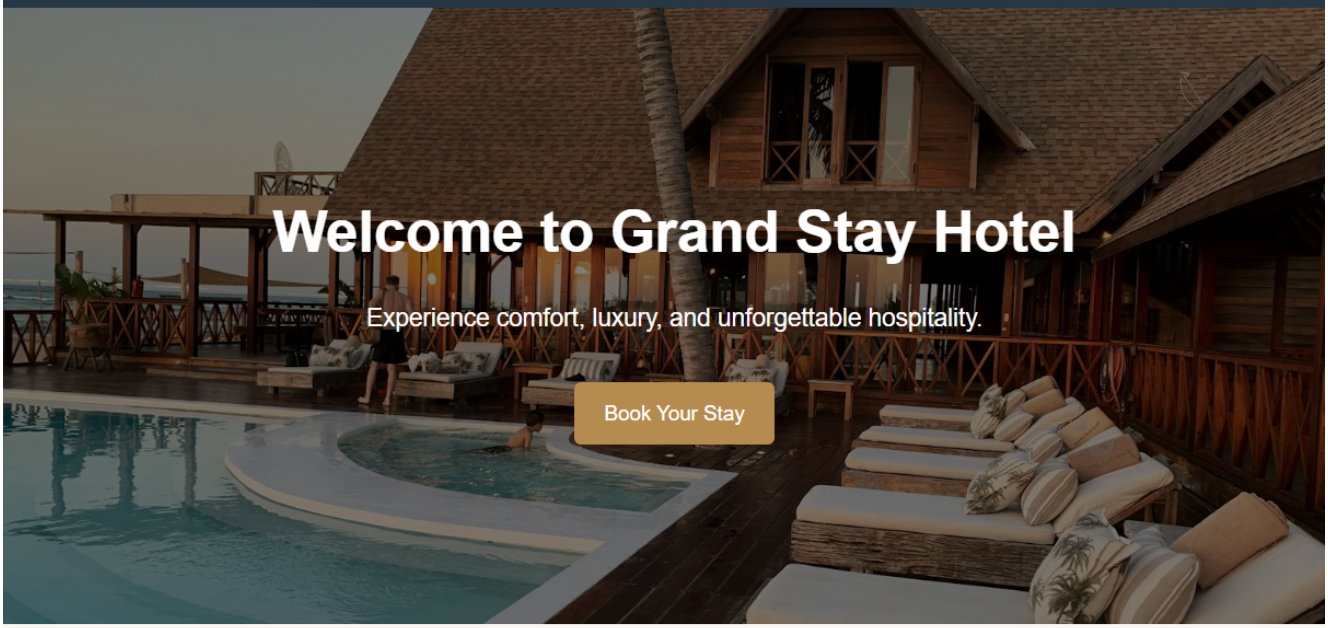

HTML5 and CSS3

Objective

To create an attractive, user-friendly hotel website interface that helps visitors explore rooms and understand the reservation process.

Case Study 23 – Gaming and Esports Community Website

Description

Develop a gaming portal that provides information about games, esports tournaments, gaming teams, players, leaderboards, and the latest gaming news.

Key Features

- Game profiles and descriptions
- Esports tournament schedules
- Gaming team information
- Player profiles
- Leaderboards and ranking tables
- Latest gaming news
- Dark theme and CSS visual effects
- Organized layout for gaming content

Technologies Used

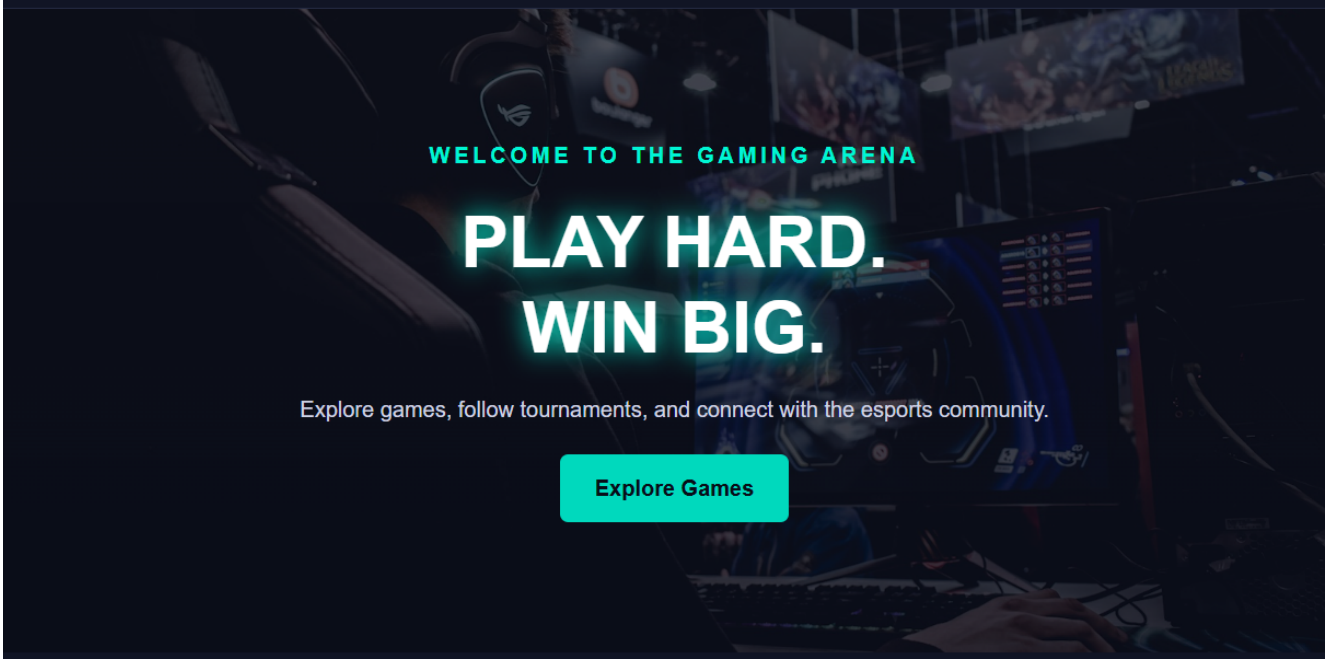

HTML5 and CSS3

Objective

To design an engaging gaming and esports website where users can explore games, follow tournaments, view player rankings, and learn about gaming events.

GAMEZONE

Home Games Tournaments Teams Leaderboard News

WELCOME TO THE GAMING ARENA

PLAY HARD. WIN BIG.

Explore games, follow tournaments, and connect with the esports community.

Case Study 24 – Community Service Project Website

Description

Create a website that documents community service activities and presents information about project objectives, beneficiaries, implementation stages, photographs, weekly reports, and outcomes.

Key Features

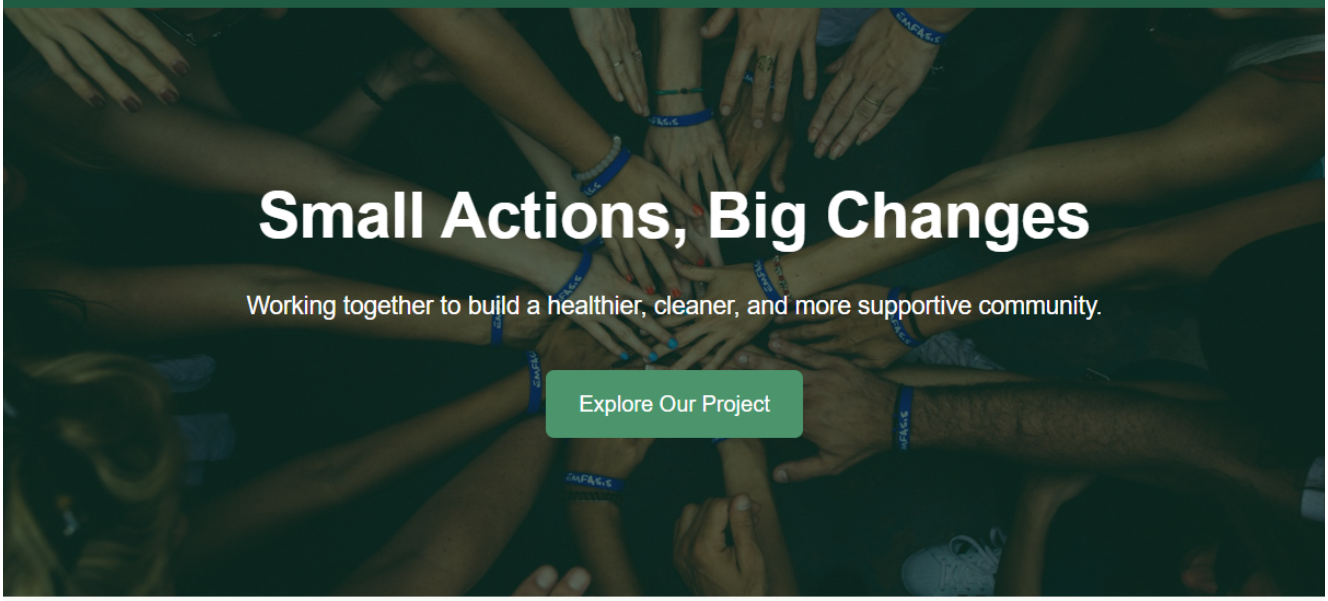

- Project introduction and objectives
- Information about beneficiaries
- Community service activity photographs
- Project implementation stages
- Weekly progress reports
- Volunteer details
- Project timeline
- Project outcomes and achievements
- Responsive website layout

Technologies Used

HTML5 and CSS3

Objective

To present community service activities in an organized manner and explain the project's contribution to community welfare and development.

Small Actions, Big Changes

Working together to build a healthier, cleaner, and more supportive community.

Explore Our Project

About Our Project

Our Community Service Project focuses on understanding local needs and creating positive social change through teamwork, awareness campaigns, and volunteer activities. This website documents our objectives, activities, progress, and achievements.

Project Objectives

Environmental Awareness

Encourage cleanliness, waste management, and environmental protection.

Community Education

Promote awareness about education, hygiene, and healthy habits.

Social Responsibility

Develop teamwork, leadership, and a spirit of service among students.

Our Beneficiaries

Local Residents

Community awareness and cleaner surroundings.

School Students

Educational support and awareness activities.

Public Community

Information about hygiene, safety, and health.

Our Activities

Cleanliness Drive

Promoting clean public spaces and responsible waste disposal.

Educational Awareness

Supporting learning and sharing useful educational information.

Green Community

Encouraging tree planting and environmental responsibility.

Implementation Stages

01

Planning

Identify community needs and define project goals.

02

Preparation

Organize volunteers, resources, and activity schedules.

03

Implementation

Conduct service activities and awareness programmes.

04

Evaluation

Review results, collect feedback, and prepare reports.

Project Timeline

Week 1 - Survey

Understand local problems and identify community needs.

Week 2 - Planning

Prepare the action plan and assign volunteer responsibilities.

Week 3 - Activities

Conduct community service and awareness programmes.

Week 4 - Evaluation

Review activities, record feedback, and document outcomes.

Weekly Reports

Week 1

Activity: Community survey
Progress: Identified local needs and project priorities.

Week 2

Activity: Project planning
Progress: Prepared tasks and organized resources.

Week 3

Activity: Awareness drive
Progress: Shared information and participated in service activities.

Week 4

Activity: Final evaluation
Progress: Reviewed feedback and documented project learning.

Our Volunteers

VL

Volunteer 1

Team Coordinator
Organizes activities and manages the team.

VS

Volunteer 2

Awareness Coordinator
Supports awareness campaigns and outreach.

VR

Volunteer 3

Report Coordinator
Documents activities and weekly progress.

Project Outcomes

Increased Awareness

Better understanding of community needs and social responsibility.

Teamwork

Improved communication, coordination, and leadership skills.

Positive Change

Practical steps toward a cleaner and more informed community.

Our Commitment

Every contribution matters. By working together, we can make our community a better place for everyone.

Community Connect

Community Service Project | Learning Through Service

Conclusion

These three case studies demonstrate the application of HTML and CSS in developing different types of websites. The Hotel Reservation Website focuses on room information and booking interfaces, the Gaming and Esports Community Website presents gaming content and rankings, and the Community Service Project Website documents community activities and their outcomes. Working on these projects helps improve web development skills, webpage design, content organization, responsive layouts, and the practical application of HTML and CSS.
